

# ONBASE

## WEB PARTS FOR MICROSOFT SHAREPOINT

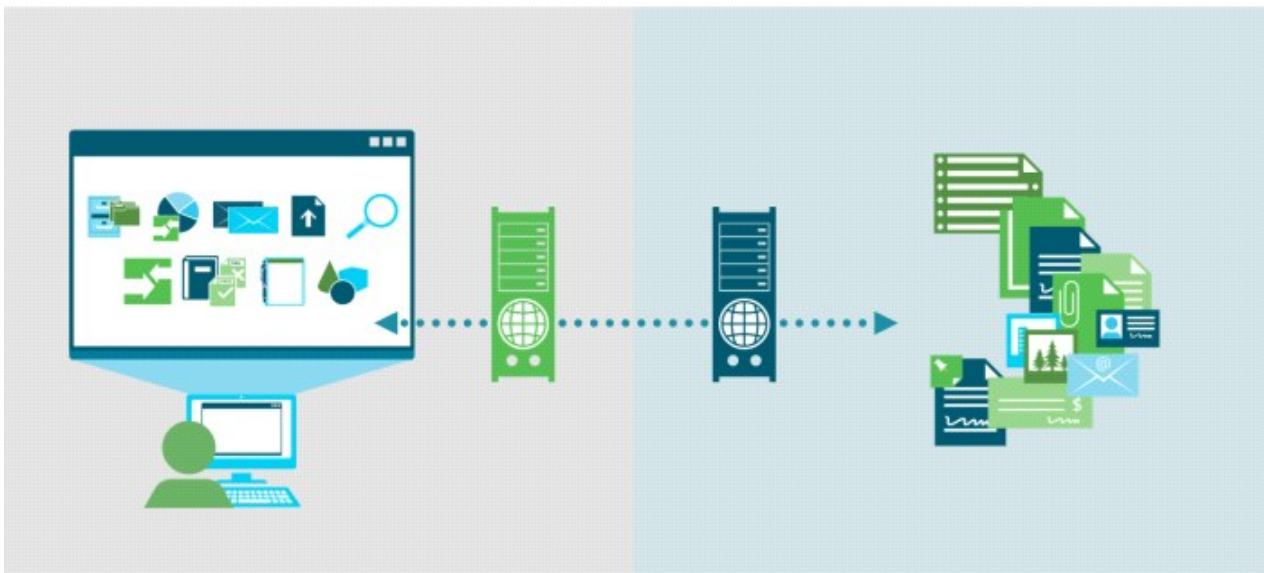

### SUMMARY

Web Parts for Microsoft SharePoint allows OnBase users to search, retrieve, view and interact with the OnBase content, automated business processes and functionality they need to perform their day-to-day job responsibilities from within their familiar SharePoint environment.

### BENEFITS

- **Leverages investments** by integrating these enterprise solutions, to take advantage of the strengths of each.
- **Promotes worker efficiency** by consolidating these enterprise solutions to a single interface and reducing the need for—and the costs associated with—end user training and support.
- **Immediate, out-of-the-box access** allowing business users to extend OnBase content and functionality into SharePoint team and executive dashboard sites without any custom development.
- **Public and remote access** to OnBase content and workflows through SharePoint extranets.
- **Deployment flexibility** with a variety of Web Parts that support both SharePoint and OnBase permission-based access.

### DESIGN

OnBase Web Parts are easily installed to the SharePoint server. When SharePoint pages that contain OnBase Web Parts are requested, the SharePoint server communicates with OnBase Web Server as needed and serves back to the browser the OnBase components and content requested.

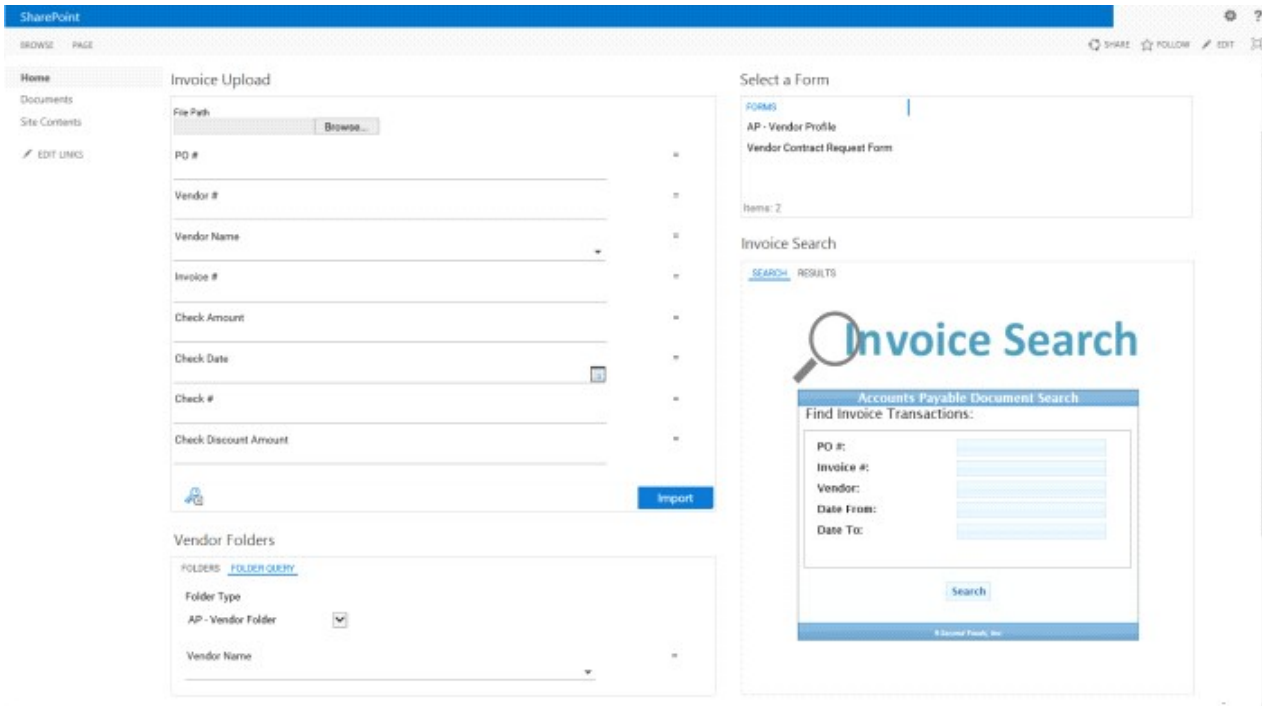

## APPLICATIONS

- **Occasional and beginner users:** enables easy access to multiple Workflow queues, standard query results and other regularly accessed content through familiar SharePoint Web pages.
- **Interface consolidation:** users who need access to OnBase and SharePoint content can view and access both through a single interface, eliminating the need to log into multiple applications.
- **Outsourcing:** allows outsourced departments' employees to view documents and interact real-time with workflows and processes via familiar SharePoint Web pages.

## KEY FEATURES

- **Web Parts extend various OnBase modules and functionality** including: Business Activity Monitoring (BAM), Custom Query, Document Knowledge Transfer (DKT), E-Forms, Envelopes, File Upload, Folders, HTML Editor, Workflow, and WorkView.
- **Easy deployment** without the need for custom development.
- **Utilizes NT Authentication or SharePoint Single Sign-On** to provide a seamless user experience.
- **Simple point-and-click configuration** of OnBase Web Parts.

## INTERFACE

*An Accounting Solution extended to a SharePoint 2016 site with OnBase Web Parts*
